

2022 New Year Resolution

How to escape the legacy software trap

Executives and IT Professionals regularly state that legacy software applications are the greatest barrier to innovation, with legacy software providers often exacerbating the issue to protect their own position. **There are 5 simple steps to overcome this...**

1

Quick Wins

Aim for easy wins – Cenata can implement Cenata SURE within 3 months.

2

Upgrade not Replace

Cenata have experience of the incumbent legacy applications in the market, and have a proven upgrade path for switching legacy solutions.

3

Compatibility

Cenata SURE can connect with placing platforms, inwards systems, third party data sources and your data warehouse.

4

Functionality

Cenata SURE's development approach ensures that required changes are deployed quickly and both technology and functionality are kept up to date.

5

Don't wait

Every day / month / year delaying a system replacement adds further legacy data and increases the size of the migration project.

**14%**

Businesses that had implemented legacy systems modernisation can increase revenue by 14%

13%

Modernising the systems can result in business costs dropping by 13%

44%

of CIOs believe that legacy systems are a major barrier in the growth of the company
